

# Create a hot water hand wash unit in any counter or cupboard

## The Variant

Practical and cost effective, the Variant provides a cutting edge hot water washing facility.

Supplied with or without bowl as required

Can be supplied with automatic sensor or push buttons

Click here to order online - or visit [tealwash.com](http://tealwash.com)

The TEAL Variant does not require running water in order to provide a really effective hand wash.

It only needs to be located near to a convenient power socket.

# Practical and cost-effective

## Features of the TEAL Variant

The TEAL Variant can be fitted into any counter or work surface and is the ideal hot water hand washing solution for any small beauty salon or catering facility where the setting up of a running water option is both impractical and expensive.

*Please note: The Variant is intended for interior use only and is not suitable for use on motor vehicles.*

- The Variant comes with options – with or without the bowl and with sensor or push buttons.
- It is supplied complete with a TEALTainer water container.
- The optional bowl is made from durable stainless steel.
- The self contained Variant is supplied as a separate set of components.

**Hands free version:** placing your hands in the bowl triggers the wash cycle and the unique Bluesensor will start to flash indicating that the water is being heated to the required temperature of 40°C +/- 2°C.

The Variant will then deliver the 10 second hot wash in a low pressure spray, ideal for hand washing under running water. When removing your hands from the bowl, the Bluesensor will re-light, showing that it has reset and is once again ready for use.

### Specification

- External bowl diameter 320mm
- Internal bowl diameter 120mm
- TEALTainer capacity 10 litres
- Power supply 230V mains
- Washes per fill 50
