Preprogrammed hand wash cycle

The ProWash wash / rinse cycle is designed to match the World Health Organization Guidelines "Clean hands protect against infection".

To start the timed wash programme:-

1. Place the hands by the Greensensor and it will flash.
2. Water runs for 4 seconds to enable the wetting of hands.
3. The water stops for 20 seconds to allow for the application of liquid soap and performance of the 9 step hand wash routine.
4. Hot water runs for 10 seconds to enable the soap to be rinsed off the hands
5. The total wash time is approximately 35 seconds.

The Hygienius ProWash features:-

- Hands free operation under warm running water.
- The water always at the optimum temperature of 40° - 43°C.
- Highly portable - the Hygienius ProWash can be plugged in to any convenient electrical socket.
